

# Cloud Storage When Cybersecurity is Non-Negotiable

Combine cloud performance and convenience with on-premise control.

## Archon Cloud Storage

Archon Cloud Storage combines the best of cloud and on-premise storage to deliver high performance, control, and compliance with data security and privacy requirements. As a fully managed service, Archon Cloud Storage includes high-performance hardware dedicated exclusively to you, plus complete lifecycle services—all for a low monthly fee. We can deploy and manage your hardware anywhere—in your data center or a third-party data center.

## The Archon Cloud Storage Difference

### Reliable

With no single point of failure, downtime instances are reduced to near zero.

### Fast

High-performance architecture, purpose-built for your specific use case, high-performance architecture is guaranteed.

### Secure

Data is encrypted at rest, with integrity checks every 90 days. Data deletion and modification prevention features available.

### Scalable

Scale capacity on-premise from 22 petabytes to exabytes.

### ADVANCED CAPACITY REPORTING

You can easily monitor performance and plan capacity upgrades thanks to the built-in web console.

### COMMERCIAL SOLUTIONS

In conjunction with the Archon CSfC Solution Suite and Archon Proxima, Archon Cloud Storage provides a cost-effective and secure data storage solution for classified data analytics or data-sharing initiatives.

### FLEXIBLE DEPLOYMENT

You can deploy in your data center or a FISMA-compliant data center depending on mission requirements and space.

### MULTI-TENANT SUPPORT

Multiple teams can securely share Archon Cloud Storage, lowering costs.
